

ANTIGRAVITY AUTOMATION GUIDE

B-Roll Auto-Generation

From Script to Indian B-Roll Clips — Fully Automated

@dr.kiran_more · Dr. Kiran More · Little Fern · Mumbai

[What to give Antigravity](#) · [System prompt](#) · [Negative prompt](#) · [Output schema](#) · [Indian prompt rules](#)

What Antigravity needs from you

Give Antigravity these 4 things and it will automatically decide what B-roll is needed, write the prompt, generate the clip via Veo, and time it to your script. You only paste the script — everything else is automatic.

1	The Script (with timestamps)	Your Hinglish script with timestamps on each line.
2	The System Prompt (instructions for Gemini)	Tells Gemini how to generate B-roll in Indian style rules.
3	The Base Negative Prompt	A fixed list of things to avoid.
4	The Output Schema	Tells Gemini exactly what JSON to output.

The only thing you do manually: paste the script. Antigravity handles deciding what B-roll, writing the prompt, generating the clip, and timing it.

The flow inside Antigravity

1. Script in →
2. Gemini reads it with your system prompt →
3. Returns JSON — one item per B-roll needed →
4. Antigravity loops through each JSON item →
5. Sends each veo_prompt to Veo / Kling →
6. Clips saved with timestamp in filename →
7. Manifest JSON sent to your editor tool

Input 1 — The Script

Paste your Hinglish script exactly like this. Each line must start with a timestamp in square brackets so Antigravity knows when each line is spoken.

```
[0s] Kya aapke baby ko roz bukhaar aata hai?  
[4s] Yeh sun ke dil ghabra jaata hai – lekin doctor bata raha hai kya normal hai.  
[9s] Baby ko 100.4 Fahrenheit se zyada bukhaar ho toh – yeh emergency sign hai.  
[16s] Lekin 99 degree tak – yeh aapka baby fight kar raha hai infection se.  
[22s] Toh kya karna chahiye? Teen cheezein yaad rakho.  
[26s] Pehli – temperature check karo. Dono kaanon mein.  
[31s] Doosri – paani pilao. Dehydration sabse bada risk hai.  
[36s] Teesri – 24 ghante mein bukhaar nahi jaata – doctor ke paas jao.  
[42s] Acchi khabar – zyada tar baby bukhaaron mein bilkul theek ho jaate hain.  
[47s] Remember – har baby alag hota hai. Apne paediatrician se zaroor poochho.  
[50s] Follow karo Dr. Kiran More ko aisi medical gyaan ke liye.
```

Rule	Detail
Timestamp format	[0s] [4s] [16s] — square brackets, number, letter s
Every line needs a timestamp	Don't skip any line — Gemini uses these to time the B-rolls
Last 10 seconds = no B-roll	Lines after [46s] will not get B-rolls (CTA zone — avatar only)
Same script as ElevenLabs	Use the exact script you already gave ElevenLabs — no changes needed

Input 2 — System Prompt for Gemini

Paste this into the Gemini instruction field in Antigravity. This is what tells Gemini to act as the Creative Director — deciding what B-roll is needed, when, and writing the Indian-specific Veo prompt for each one.

```
You are a Creative Director for @dr.kiran_more,  
an Indian NICU specialist and pediatrician in Mumbai (Little Fern).  
  
Read the Hinglish script. Decide where B-roll video clips are needed.  
Output a JSON array. Each item is one B-roll clip.  
  
TIMING RULES:  
  
- First B-roll must start by second 4  
  
- No B-roll after second 46 (CTA zone – avatar only)  
  
- Each clip: minimum 4 seconds, maximum 8 seconds  
  
- Add B-roll when doctor mentions: symptom / warning sign /  
medical action / body part / food / medicine / object  
  
EVERY veo_prompt MUST contain ALL 6 of these:  
  
1. SHOT TYPE – choose one:  
Close-up / Macro / Medium shot / Overhead flat-lay  
  
2. SKIN TONE – always say one of:  
'warm brown South Asian skin tone'  
'deep warm Indian skin, dark hair'  
  
3. CLOTHING – always say one of:  
Baby: soft cotton jhabla / printed Indian cotton onesie  
Mother: printed cotton nighty / cotton salwar kameez  
Father: plain cotton kurta  
Grandmother: white cotton saree  
  
4. INDIAN SETTING – always say one of:  
Mumbai apartment bedroom with warm yellow overhead bulb light  
Indian home with mosaic tile floor
```

Indian pediatric clinic with yellow painted walls

Indian kitchen with steel utensils in background

5. INDIAN PROP – always include at least one:

steel katori / gold wedding bangle / digital ear thermometer

printed Indian cotton blanket / ORS sachet

small Krishna or Ganesh idol on shelf (softly blurred)

6. LIGHT – always say one of:

warm yellow overhead bulb light (indoor day/evening)

dim yellow bedside lamp (nighttime)

afternoon sun through thin cotton curtains (daytime natural)

warm indirect tube light (clinic)

END every veo_prompt with:

photorealistic documentary style, 9:16 vertical frame

Return ONLY a valid JSON array. No markdown. No explanation.

Input 3 — Negative Prompt

Paste this into the negative prompt field in Antigravity. It applies automatically to every single clip that gets generated — you never need to change it.

```
cartoon, CGI, 3D render, illustration,  
Western-looking baby, pale skin, blonde hair, blue eyes,  
studio lighting, ring light, bright white walls,  
IKEA-style furniture, stock photo aesthetic,  
watermark, text in frame, logo,  
distorted hands, extra fingers,  
hospital white room,  
smiling when context is serious
```

Why each item is in the negative prompt

What to block	Why
cartoon, CGI, 3D render	Veo defaults to AI-stylised looks — block it to get real footage
Western baby, pale skin, blonde hair	Without this Veo generates Western-looking babies even if you say Indian
studio lighting, ring light	Makes it look like an ad — you want documentary realism
bright white walls	Indian homes have warm cream or coloured walls, not white
IKEA furniture	Indian homes use steel almirahs, wooden furniture — not IKEA
stock photo aesthetic	Forces Veo away from its default posed look
distorted hands, extra fingers	Common AI generation error — block it always
hospital white room	Veo associates baby + medical with hospital — you want home setting
smiling when context is serious	If the script is about fever warning signs, baby shouldn't be smiling

Input 4 — Output Schema

Tell Antigravity to expect this exact JSON format from Gemini. Antigravity will loop through the array and send one Veo API call per item. Each field maps directly to what Veo needs.

```
[
  {
    "start_second": 4,
    "end_second": 9,
    "duration_seconds": 5,
    "scene": "plain English – what the shot shows",
    "veo_prompt": "full Indian B-roll prompt goes here",
    "negative_prompt": "same negative prompt as Input 3",
    "caption_text": "short Hinglish caption or null"
  },
  {
    ... next B-roll ...
  }
]
```

What each field means

Field	What it means	How Antigravity uses it
start_second	When to show the B-roll clip	Editor overlays clip at this timestamp
end_second	When to stop showing the clip	Editor stops the clip here
duration_seconds	How long the clip is (end minus start)	Sent to Veo as video length
scene	Plain English description of the shot	For your review — not sent to Veo
veo_prompt	Full Indian B-roll prompt	Sent directly to Veo/Kling API
negative_prompt	Things to not generate	Sent to Veo as negativePrompt
caption_text	Hinglish text overlay (or null)	Editor adds as subtitle at that time

Ready-to-Use Indian B-Roll Prompts

Copy any of these directly into your Veo/Kling prompt field. Each one already follows all the Indian detail rules.

Baby with fever

Close-up shot, Indian newborn baby (4-6 weeks old, warm brown South Asian skin, dark hair) lying in a steel-framed crib, flushed cheeks, digital thermometer beside them showing 101F, Indian mother's hand with gold bangle gently touching baby's forehead, warm yellow overhead bulb light in Mumbai apartment bedroom, printed cotton curtains softly blurred in background, photorealistic documentary style, 9:16 vertical frame

Worried Indian mother at night

Medium shot, Indian mother (South Asian, 26-30 years, warm brown skin, hair in loose bun, printed cotton nighty), sitting cross-legged on bed holding fussing baby at 3am, tired eyes and furrowed brow, dim yellow bedside lamp only light, Mumbai apartment bedroom with steel almirah visible in soft background, photorealistic, slight natural camera shake, 9:16 vertical frame

Father checking temperature

Close-up shot, Indian father's hands (South Asian, warm brown skin, plain cotton kurta sleeves visible) holding digital ear thermometer against Indian baby's ear, baby wrapped in printed Indian cotton blanket, warm yellow overhead bulb light in small Mumbai bedroom, mosaic tile floor partially visible below, photorealistic, 9:16 vertical frame

ORS preparation

Overhead flat-lay shot, Indian mother's hands (gold wedding bangles visible, warm brown skin) tearing open ORS sachet over steel glass of water on kitchen counter, Indian kitchen with mosaic tiles in background, small steel katori and spoon beside glass, warm afternoon window light from left, photorealistic, 9:16 vertical frame

Baby oil massage (tel malish)

Medium shot, Indian grandmother (60-65 years, deep warm South Asian skin, white cotton saree with thin border) performing traditional oil massage on Indian newborn lying on soft cloth on floor, small steel katori of coconut oil beside her, warm morning sunlight through jali window, Mumbai home interior with small Ganesh idol subtly visible on shelf, photorealistic, 9:16 vertical frame

Vaccination at Indian clinic

Close-up shot, Indian baby's chubby arm (3-4 months, warm brown skin) receiving vaccination injection from gloved medical hands, Indian pediatric clinic with yellow painted wall and Hindi health poster partially visible in background, warm indirect tube light of clinic, baby's face not in frame, photorealistic, clinical-trust mood, 9:16 vertical frame

Baby first solid food

Close-up shot, Indian mother's hands offering small steel katori of mashed banana to seated Indian baby (6 months, warm brown skin, cotton jhabla), baby's expression curious and tentative, Indian kitchen table with steel utensils and small pressure cooker softly visible in background, warm afternoon overhead light, photorealistic, 9:16 vertical frame

Baby safe sleep position

Medium shot, Indian newborn baby (warm brown skin, dark hair) lying on back in firm cotton mattress crib, wrapped in thin printed Indian cotton swaddle, small Krishna idol on shelf softly visible in background, warm yellow night lamp glow, Mumbai apartment nursery, photorealistic, peaceful mood, 9:16 vertical frame

Pre-Generation Checklist

Before sending any prompt to Veo or Kling, check every item below. If any box is not ticked, the clip may not look Indian.

Must have (tick all 7)

- Did I mention skin tone? (warm brown South Asian skin / deep Indian skin tone)
- Did I mention clothing? (cotton jhabla / printed nighty / cotton kurta / saree)
- Did I mention an Indian setting? (Mumbai apartment / Indian home / Indian clinic)
- Did I mention an Indian prop? (steel katori / gold bangle / thermometer / blanket)
- Did I mention warm yellow bulb light? (not studio / ring light / white light)
- Did I end the prompt with: "photorealistic documentary style, 9:16 vertical frame"
- Did I add the negative prompt to the Veo API call?

Common mistakes that break the Indian look

- Using just "Indian baby" without skin tone, clothing, setting details
- Using studio lighting / ring light / bright white light
- Forgetting the negative prompt — Veo will give Western-looking output
- Not specifying shot type — Veo picks randomly
- Using generic background like 'bedroom' instead of 'Mumbai apartment bedroom'

Quick Reference — Indian Details

Category	Use these words
Skin tone	warm brown South Asian skin deep warm Indian skin, dark hair golden-brown complexion
Baby clothes	soft cotton jhabla printed Indian cotton onesie thin muslin swaddle
Mother	printed cotton nighty cotton salwar kameez cotton saree with border
Father	plain cotton kurta printed casual kurta
Setting	Mumbai apartment bedroom Indian home mosaic tile floor Indian kitchen
Clinic	Indian pediatric clinic, yellow painted walls, Hindi health poster in background
Props	steel katori gold wedding bangles ORS sachet printed cotton blanket
Light (day)	warm yellow overhead bulb light afternoon sun through thin cotton curtains
Light (night)	dim yellow bedside lamp single warm bedside lamp only

**End every prompt
with**

photorealistic documentary style, 9:16 vertical frame
